Depolarized Figure 1 Voltage dependence of hypoxia-induced apamin-sensitive inward currents.

(A) Peak current amplitude at 0 mV normalized to the amplitude at 0 mV in control conditions. Data presented as mean ± SEM, F2-W2, n = 10.

(B) Peak current amplitude at -90 mV normalized to the amplitude at -40 mV in control conditions. Data presented as mean ± SEM, F2-W2, n = 10.
